

The following *minimum* tools are required for all students entering the Electrical Technology Program.

Tools must be *exactly* as noted below (same brand and model number). Ideal™ brand tools may be substituted, as long as they are an *exact* match in all dimensions. *It is recommended that you consult with the electrical instructor's before purchasing anything other than that listed below.*

Students may purchase their tools anywhere that it is convenient for them, although it ***is not required*** that tools be purchased prior to the first day of class. An electrical vendor will be in the classroom the first week of class to take orders for tool sets at a special educational price and deliver them to the classroom, should students choose to wait to purchase their tools.
