PIGS, PROCESS, AND SUSTAINABILITY

"Handcrafted and archetypal, the images evoke a mythopoetic relationship with nature that expresses places and creatures both real and imagined. Through tactile, natural materials such as grass seed, spanish moss, topsoil and feathers the artwork fuses ecology and mythology bearing witness to nature's power as well as its vulnerability."

A MAGNIFICENT MIGRATION

"Colors and intricate patterns are fading; the paint peels and wood rots away under heavy feet and wrinkled hide. These sculptures express the joy I find in the animal form, and lavish decorations celebrate them as the greatest show on earth."
